

1/EH-26 (i) (Syllabus-2015)

Date of Exam : **2019** (ii) Sub. No. : **EH** (a) .
 Date of Exam : **September/October** (b)
 Date of Exam : **October** (c)
 Date of Exam : **December** (d)

GEOLOGY

Date of Exam : **September/October** (a)
(Elective/Honours) (b)

(GELH-101)

(General Geology, Crystallography and Mineralogy)

Marks : 56

Time : 3 hours

*The figures in the margin indicate full marks
for the questions*

Answer four questions, selecting one from each Unit

UNIT—I

(General Geology)

1. (a) What is shadow zone? Explain P- and S-wave shadow zone with the help of a neat diagram. 2+5=7
- (b) Write the geological timescale in tabular form. 7

2. (a) What is the difference between erosion and mass-wasting? Discuss the geological work of glacier and the resulting erosional features. $2+3+5=10$
- (b) Explain different types of plate boundaries. 4

UNIT-II

(Crystallography)

3. (a) Discuss parameters and Miller indices. Mention the factors that control the size and perfection of a crystal. $5+2=7$
- (b) Describe different types of forms developed in the normal class of the tetragonal system. 7

4. Write notes on any four of the following :

- (a) Forms and basic names of different types of forms
- (b) Axes, symbols and symmetry elements of the normal class of hexagonal system
- (c) Parallel growth
- (d) Substitution of elements
- (e) Types of twins

UNIT-III Minerals and their properties

(Mineral Optics)

5. (a) Describe the physical properties of minerals. 9
- (b) Why and how is Nicol prism constructed from calcite? $1+4=5$

6. Write notes on (any two) : $7 \times 2 = 14$

- (a) Polymorphism and isomorphism
- (b) Structures with SiO_4^- and Si_3O_9^- groups
- (c) Birefringence and extinction

UNIT-IV

(Descriptive Mineralogy)

7. (a) Describe the various types of rock-forming minerals. 6
- (b) How do feldspar group minerals differ from feldspathoid group minerals? Write the physical and optical properties of the feldspathoid group of minerals. $2+6=8$

(4)

8. (a) Name the important members of the feldspar group of minerals. Describe the physical and optical properties of any two members of the group. $2+6=8$

(b) Discuss the physical and optical properties of any two of the following minerals. $3 \times 2 = 6$

(i) Biotite

Sodium

(ii) Diopside

(iii) Forsterite
